FRONTEND SOFTWARE ENGINEER

I am a frontend software Engineer with a background in Engineering and IT skills. I possess strong skills in problem solving, creative thinking, communication and collaboration that leads to quality products & results. I am a passionate programmer and a quicker learner, and I easily adapt to new environments. I am very good at team-work and goal oriented.

TECHNICAL SKILLS

Languages: Javascript, CSS, HTML	Version Control: Git, GitHub
Tools: VS Code	Frameworks/Libraries: React/ React hooks

TECHNICAL PROJECTS

E-commerce app - GitHub FrontEnd: github.com/Doziechuks/glamour-clothing-app | Live Site: https://glamour-clothing-app.vercel.app
An e-commerce cloth shopping application built with React/React hooks.
- Used React Hooks and Redux/react-redux to manage local state and global state respectively and to keep information organized
- Integrated Firebase to login, sign-up, and sign-in with google
- Integrated paystack for online payments
- Used CSS for styling
- Deployed with Vercel for frontend

Portfolio web app - GitHub FrontEnd: github.com/Doziechuks/Jinli-portfolio | Live Site: https://sample-gamma-nine.vercel.app
A simple portfolio web-app application built with React/React hooks.
- Used React Hooks and Redux/react-redux to manage local state and global state respectively and to keep information organized
- Used CSS for styling
- Deployed with Vercel for frontend

Random Password Generator - GitHub FrontEnd: github.com/Doziechuks/Random-Password-Generator | Live Site: passwordgenerator-one-ochre.vercel.app/
A JavaScript random password generator project. It has a counter that changes the password after 10 seconds.
- Used vanilla JavaScript to create functionalities
- Manipulated and traversed the DOM using event handlers
- Used CSS for styling
- Deployed with Vercel for frontend

To-do list - GitHub Frontend: github.com/Doziechuks/mydaily_to-do_list | Live Site: mydaily-to-do-list.vercel.app/
A to-do list created with JavaScript. Users can create daily activities on the app. It has a checkbox to tick completed activities and a delete button for removing any activity, this enhances its flexibility. It also has an updated date and time.
- Used vanilla JavaScript to create functionalities
- Used browser local storage for storing data.
- Manipulated and traversed the DOM using event handlers
- Used CSS for styling
- Deployed with Vercel for frontend

PROFESSIONAL EXPERIENCE

- Gained hands-on experience with JavaScript, CSS, HTML, and tech principles whilst working on team/individual projects, and pair programming sessions.
- I worked as a quality control and assurance personnel in a plastic production firm.
- I lead a team of data analysts using Microsoft Excel and also a lead researcher in a research institute.
